

Andrea Reddy has a mind tuned in to numbers and figures.

It all adds up for Andrea

ANDREA Reddy from Gordon Road Girls' School, participated in the SEMAS (Soroban Educational Mental Arithmetic System) national competition in Johannesburg.

There were 450 children competing and Andrea did the adding up, invited to sit for the PAMA (Pan-Pacific Abacus and Mental Arithmetic Association) international exams in March next year.

She is in line to attend the next PAMA International competition in Taiwan, also in 2012.

"This is a huge achievement for me as it is an honour to be selected. I have worked hard to get to where I am and will have to continue with the same trend in order to get through the qualifying rounds," said Andrea.
